1 Making endnotes clickable

The new syntax for the `\endnote` command is,

```
\endnote*[<num>]{<note-text>}\label{<name>}
```

The use of * causes the endnote mark not to appear. If `\label{<name>}` appears, a hypertext links is created pointing to the placement of the endnote at the end of the document.

- Some beginning text.[1]

- Refer to endnote.[2]

- Another method is to use the *-form and use `\autoref` to display the reference to endnote 3.

- Now make another endnote.[4]

- This is an endnote with two paragraphs in endnote 5.

- Here, we try `\Nameref`, `\nameref`, `\autoref`: 'Notes' on page 2, Notes, endnote 2.

- This is a specially number endnote.[N1]

- We reference endnote[6] on page 2.
